

Therapy LASER Med-200 Duo

Acupuncturist • Auriculo-Therapist
General Practitioner • Dentist • Veterinarian • Neural Therapist
Natural Practitioner • Physical Therapist

In 2004 **LASOTRONIC** introduced a world novelty:

The DUO Therapy Laser with parallel emission of visible red and infrared light. It was our goal to create a small, well designed, handy, reliable and battery operated therapy laser. With its 130g weight it is a pleasure to hold, to operate and to work with.

Standard accessories

- Transportation case containing
- Acupuncture head
- General treatment head
- Leather case
- 6 x 1,5V Alkaline batteries
- Instruction manual
- Powermeter with timer
- Housing: Aluminium anodized in blue

Technical features:

- Continuous wave emission of optionally visible red or infrared or both
- 7 Nogier-Frequencies
- Measurement of maximum output power with powermeter and timer
- Safety lock with key
- 3 different treatment heads
- 4 different optical fibres
